

**SINGLE SKIN CHEMICAL TANKS**

Our range of Single Skin Bulk Chemical Storage Tanks is primarily designed for the storage of nonhazardous chemicals. They can also be installed within an existing area featuring adequate secondary containment.

You can choose from 18 different models, available in a range of 9 capacities from 1,150 litres to 11,000 litres. And whichever model you choose, you can be confident it's manufactured from a specialist, chemical grade of Medium Density Polyethylene.

- **850 Litre Open Bund Chemical Tank**

In the downloads section it says 850 Litre Open Bund Chemical Tank Brochure but when you download this its an image of a 2500 Fuel Point.

- **Chemical Tanks -Downloads**

In the download section on all the Enclosed, Open and Single Skin chemical tanks can the word brochure be removed as this is a spec sheet for the products.

- **Chemical Tanks -Accessories Page?**

In the Enclosed & Open Bund Chemical Tanks under additional equipment it says see accessories page but there is no accessories page?

The Single Skin Chemical Tanks have the additional equipment listed under the tab.
